DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 recites the limitation "a user interface for receiving input parameters for performing control of *the measurement section* " in line 3-4. There is insufficient antecedent basis for this limitation in the claim.
3. Regarding claims 2 and 3, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Kmack et al. Kmack et al. teach an analysis system, built in analyzer or connected to an analyzer, containing one or a plurality of software programs for analyzing measurement data output from the analyzer. Note Kmack et al. column 8, lines 21-35. Kmack et al. teach a user interface for receiving input of parameters for analysis of measurement data. Note

Art Unit: 2863

Kmack et al. column 8, lines 40-54. Kmack et al. teach means capable of arbitrary customization of the user interface. Note Kmack et al. column 11, lines 19-28. Kmack et al. teach means capable of saving and restoring customized user interface states not Kmack et al. column 5, lines 6-8.

3. Claims 2 and 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
4. Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
